## PROFILE

A web developer, AI-assisted developer, prompt engineer, and product builder with a background in Business Administration and Management. I build and refine digital products by combining modern web development, AI-assisted development, prompt engineering, product thinking, and business understanding. Experienced in translating business requirements into functional digital products, troubleshooting implementation issues, improving user interfaces, and preparing applications for deployment. Focused on SaaS products, business management systems, AI-powered applications, automation, consumer-facing products, and Web3.

## EXPERIENCE

### Web Developer / Product Builder | Hotel Workforce Management System (HWMS) | In Development

- Building a workforce management platform for hotel operations, bringing employee records, attendance, leave, scheduling, and workforce information into one system.
- Implemented authentication, hotel/workspace structure, employee management, employee onboarding, attendance dashboard, leave management interface, workforce statistics, employee search and filtering, and role/department structures.
- Translate operational requirements into product features and use AI-assisted development to accelerate implementation, debugging, refinement, and documentation.

### Web Developer / Product Builder | AniVerse | In Development

- Building an anime streaming web product focused on a cleaner, modern viewing experience with emphasis on interface design and usability.
- Developing and refining the product using AI-assisted coding, TypeScript/React-based web development, component-driven UI, debugging, asset optimization, and deployment preparation.
- Created and integrated a product walkthrough experience and structured the project for continued feature development.

### Web Developer / Website Project | Kinkie's Place | Completed

- Built a completed website for a beauty and wig business, focused on product presentation, customer discovery, inquiries, and booking.
- Implemented responsive customer-facing website experiences, including product and customer-gallery content.
- Live website: kinkiesplace.com

### Founder / Product & Web Development Brand | Izzie Digital Studio | Ongoing

- Developing a digital studio focused on web development, AI-assisted product building, digital solutions, and technology-driven business ideas.
- Explore product concepts, build digital experiences, and combine business strategy with software development and AI workflows.

## WEB3 & BLOCKCHAIN EXPERIENCE

- Experience with mainnet and testnet activities, DeFi projects, on-chain workflows, wallet operations, and NFT platforms.
- Hands-on experience with Web3 product interactions and ecosystem research, including NFT interactions and marketplace activity.

## EDUCATION

Higher National Diploma (HND), Business Administration & Management  
Federal Polytechnic, Ado-Ekiti | 2024

National Diploma (ND), Business Administration & Management  
Federal Polytechnic, Ado-Ekiti | 2022

## SKILLS

### Professional Skills

Web Development • AI-Assisted Development • Prompt Engineering • Product Development • SaaS Product Development • UI/UX Implementation • Responsive Web Design • Software Debugging & Troubleshooting • Requirements Analysis • Technical Documentation • AI Workflow Design • Web3 & Blockchain Operations •

On-Chain Activities • Product Research • Next.js • React • TypeScript • JavaScript • Tailwind CSS • HTML5 • CSS3 • Git • GitHub • Vercel • VS Code • AI Coding Assistants • OpenRouter • n8n • Make.com • Obsidian

### **Soft Skills**

Leadership • Team Management • Problem-Solving • Adaptability • Initiative • Critical Thinking • Continuous Learning • Attention to Detail • Strategic Thinking • Communication • Resourcefulness • Creativity

### **ADDITIONAL FOCUS**

AI, prompt engineering, web development, software architecture, automation, SaaS, product strategy, entrepreneurship, Web3, and digital product development.
